

Upload Test Document

This document was uploaded via the API to test the upload endpoint. It contains information about troubleshooting email delivery issues.

Common Email Issues:

1. Emails going to spam folder: Check your SPF, DKIM, and DMARC records.
2. Emails not being received: Verify the recipient address and check bounce logs.
3. Delayed email delivery: Check your email queue and server load.
4. Attachment issues: Ensure attachments are under 25 MB and not blocked file types.
